Report to the Listener

Valerie van Isler, General Manager

Summer in the city... the sound of music through open windows, a cool wind through the night leaves, an anguished cry down a lonely street. It is the best of times... and the worst of times.

As we move into the long summer months, the world is still reeling from the winter war; the nation is caught in a serious recession; the economy seems bent on going backwards except for inflation; and the city has a billion dollar budget gap where the only cuts made are those which hurt most—in social services, health care, education and human kindness.

This summer, WBAI will be broadcasting a series of special programs on many of these concerns, as you will see in this double issue of our *Folio*. These are the legendary dog days of the season that can be heady, hot, and dangerous--and probably will be again this year.

For our part, we will be producing a week of special reports beginning on Monday, July 22 with a major national program on the Shadow Government and the October Surprise. We'll examine some of the new facts and evidence in a discovery process with attorney Daniel Sheehan of the Christic Institute. This is the lead program in our Summer Fund Drive—a special week of reports on some of the hottest issues around. We'll also look at important environmental issues from a global, national, and local perspective in a full day of programming. The impact of the budget crisis on the people of this city and the resulting quality of life will be featured in several reports and on-air public hearings.

During this special week, WBAI will be broadcasting Part Two of Pacifica's *Home Front* series from our sister station, KPFK in Los Angeles: "Drugs and Thugs: A Town Hall Meeting on Drugs and Civil Liberties." In August, Berkeley's KPFA will follow with its town hall production, "Bleeding to Death: Access to Health Care," a national issue in the coming presidential campaign. Tune in for these satellite programs and many more surprises, including our new live radio dramas broadcast from the New York Public Theatre and the all-day block party with music and arts from the Nuyorican Poets' Cafe on the Lower East Side.

And most of all, from all of the us at WBAI, have a wonderful summer and stay tuned for some powerful, experimental, and interesting programming on this—your community radio station. We can only survive these long, hot summers with your continued support. So please renew your membership or send in your donation today so that we will be here for you tomorrow.

We sat around my office late one hot Friday afternoon in May fretting about WBAI's chronic money problems during these depressed times. It was too hot already. The city was gearing up for a yellow ribbon parade and there were more homeless people on the streets than ever. Mario had to leave early to catch a baseball game. And I wanted to see the new Madonna movie, *Truth or Dare*.

I already felt Madonna had become far more important without our realizing it. A year ago the *Folio* had an article presenting Mandela and Madonna as the two cult figures of note back then.

We knew we had to plan another "microthon"—a mini membership drive—in July, and we needed a theme to wrap it around. Hence: "Hot Days."

"Hot Days." Five days of hot programming we hope will make us all sit up and take notice.

Daniel Sheehan, The Christic Institute's lead counsel, is one of the most important people in North America today. He's been involved in some of the leading edge events in our time: Watergate, Silkwood, the Ku Klux Klan and Greensboro, Attica, Iran-Contra, and now the October Surprise and a new political agenda for the United States. We plan a live investigation of the men in the shadow government and their connections to the October Surprise as we begin five hot days of programming in July.

During these "Hot Days" we'll also examine the Bush initiative to tighten the grip on the rights of dissenters in this country. Samori Marksman will lead a powerful panel of critics, including leading thinkers from the Center for Constitutional Rights, as they shine a light on the increasing danger of real repression in an increasingly dangerous United States of America.

Some months ago I was asked to speak at a seminar organized by the Center for Communications, a non-profit organization linking the media industry to universities. At the time I asked why it was that no mainstream media had challenged the Pentagon press restrictions in the courts, thereby joining WBAI/Pacifica, *The Nation*, and other progressive media organizations.

I presented this possibility: that it was not in the established media's interests to report the Gulf war fully. The major media are not really interested in news and information. They are more concerned about profit, and they need to satisfy the bottom line before they satisfy consumers seeking critical information.

The New York Times (2/7/91) wrote that, "National advertisers have been extremely reluctant to buy commercial time on the special network news programs about the war in the Persian Gulf, and the absence of advertising may reduce war-related coverage on at least one network, CBS...."

Howard Stringer, CBS Broadcast Group President, said that the CBS news division might be forced to scale back plans for prime-time war specials. ABC and NBC executives agreed that lack of advertising on news programs was a serious financial problem. At CBS, it was reported that advertisers had been offered assurances that war specials could be tailored to provide better lead-ins to commercials, such as patriotic views of the United States.

Howard Stringer said about CBS, "You are absolutely going to see fewer prime time news specials on CBS. In fairness to our shareholders, we can't lose $1 million every time we do them."

The conclusion I draw from this is that whilst war is good for ratings, it stinks for advertisers. It follows that the less the big media show us the real story of war, the better it is for profits. It's easy to understand why the major media did not join us in our suit against the Pentagon. It was convenient for them to go along with the restrictions, blame the Pentagon for stopping the media from telling the real story of the war, and thereby deflect criticism about self-censorship.

This is, of course, all part of our New World Order, and I hope you will be challenged, engaged, and stimulated during our "Hot Days" in July as we try to better understand what in the world is happening.

Stay tuned!

A Hot Day in the Shadows
Monday July 22
6:00AM-11:00PM

"What startled me most were the snapshots of President Bush, as revealed through the words of some of his senior advisors. Rather than the cool, thoughtful, and reassuring chief executive who appears on the tube night after night, Bush comes across as a hot-headed, impulsive, disorganized leader with a mean streak. Colin Powell sees him as a cowboy with 'six shooters in both hands' blazing away. Dick Cheney confides to Crowe that Bush can be downright 'vindictive.'"

(Clay Blair reviewing *The Commanders* by Bob Woodward.)

Join us as we poke around the shadows for some true stories that will chill you to the bone despite the record temperatures!

Also today—George Bush's terrifying "anti-terrorism" campaign that sets out to:

- Permit execution of the mentally ill
- Expand the death penalty on Native American Indian reservations governed by tribal law
- Expedite death penalty appeal proceedings
- Permit evidence from illegal wire taps
- Create a "national security" exception allowing the FBI access to telephone and credit records without a court order.

Join Samori Marksman for a discussion and analysis of the issues.

Stay tuned for an evening with the Shadow Government, with Christic Institute lead counsel Danny Sheehan holding the flashlight. From 7:00-10:00PM we'll conduct our live investigation of the October Surprise, the Reagan handlers' strategy to win the 1980 elections by preventing the release of the 52 hostages in Iran during Jimmy Carter's administration. Join leading participants and witnesses for a three-hour discovery process that will take us deep into the story and reveal how our Constitution has been consistently undermined. More than a decade later the mainstream media holds a flickering candle to the story. WBAI keeps feeding its bonfire.

A Hot Day at the Beach
Tuesday July 23
6:00AM-11:00PM

South Beach, Staten Island

What about the environment anyway? The modern environmental movement is badly in need of reform. After almost 30 years of educating and organizing, environmentalists can point to few significant victories and no dramatic increase in appreciation of the problems. Yet the crises continue to deepen. We need a revolution!

Fortunately there is one, and it's been happening at the grassroots. In the United States, some 8,000 community activist organizations have emerged in the last 10 years, and they are now including the fight for clean air and water in their crowded agendas.

The split between local communities and large environmental groups is false. It is made worse by some environmentalists who refuse to acknowledge the strength and intelligence of community groups. And it is cynically exploited by corporate interests. Mainstream environmentalists who ignore these facts will be isolated from the most effective and innovative developments in an expanding movement.

Join us as we spend a day in the environment. Produced by Evelyn Tully Costa.

A Hot Day at the Ball Park
Wednesday July 24
6:00AM-11:00PM

It's summer and the boys and girls want to offer a summer activity that stimulates. Join us as we follow the metaphor for this North American pastime: wind-up-pitchit-swish-crack-roar- and America red, white and blue's glued to the set in the summer while the new world order's marchin' in:

Baseball and Cuba
Baseball and the age of innocence
Baseball and women
Baseball and Latinos
Baseball and the Sandinistas
Baseball films and books
Baseball and labor

plus baseball skits, spoofs, puns, and all the stuff you'd expect from WBAI.

A Hot Day in the City
Thursday July 25
6:00AM-11:00PM

It was like deja vu all over again: cameras were clicking, reporters listening anxiously, and a top elected official was standing at the podium justifying an overwhelming use of public force in the name of restoring stability. No, it wasn't George Bush giving the thumbs up to Operation Desert Storm; it was Mayor David N. Dinkins lauding the success of Operation Restoration, the city's attempt to "liberate" Tompkins Square Park.

The city's June crackdown and closing of Tompkins Square Park assured Lower East Siders of a long, hot summer. That it came under the guise of a restoration effort (with a price tag of almost $2.5 million) in the midst of one of the city's gravest fiscal crises is a classic bit of urban irony which New Yorkers will have to live with for many years. City officials called the action necessary. The Mayor said homeless people living in the park were given many options to leave, and that other "methods" to settle the problems at the park had failed. He applauded the "swift" and "decisive" work done in cleaning out the park.

As the nation's warmakers and their supporters in the city prepared for an audacious display of militarism in a so-called victory celebration up Broadway, working people throughout New York braced themselves for a series of drastic cuts in basic human services designed to balance the city's scandalous deficit. Yet the city estimates that it will cost almost $10 million in overtime pay to guard the park for the summer. Once again, money will be pumped into defense, in this case the New York Police Department.

In this all day special, we will use Tompkins Square Park as a launching pad for our analysis of the city's ills. Our producers will explore everything from homelessness to cuts in health care; from library closings to the drying up of neighborhood pools. We will then ask, "Will there be a victory parade for the veterans of Operation Restoration?"

A Hot Day with Madonna

Whose World Order?

by Daniel Sheehan

The following are excerpts from a speech given at a WBAI-sponsored forum, The New Middle East and the New World Order, *at New York University Law School on May 23, 1991. Daniel Sheehan is lead counsel of the Washington, D.C.-based Christic Institute. Tune in from 7:00-10:00PM on Monday, July 22 as Sheehan and others investigate the Shadow Government.*

On August 10, 1990, only eight days after the incursion of Iraq into Kuwait, a rather extraordinary event occurred at the Cairo Arab Summit. On the open floor of the conference, Foreign Minister Sabah of Kuwait confronted Tariq Aziz, the Foreign Minister of Iraq. Minister Sabah jabbed his finger at Tariq Aziz and said, "You nasty rascal! You and your people invaded my country. It was a unilateral act of military aggression. It was totally unjustified and you people are going to be made to pay for this."

Tariq Aziz turned to him, pointed his finger, and said, "You ought to be extremely careful of what you say to me in public. We are in possession of documents that prove the meetings you were holding in the Foreign Ministry of Kuwait with United States Central Intelligence Agency officials were to work out a covert operation against Saddam Hussein." On hearing this, Minister Sabah passed out. He fainted in front of everybody.

Those of us who are lawyers tend to have a longing for documents. We at the Christic Institute obtained some fairly quickly and we discovered a memo from November 14, 1989 (some six to seven months prior to the initiation of hostilities in the Middle East). It was a memorandum prepared by the Security Minister of Kuwait detailing the contents of meetings he was holding with the Director of the CIA at the agency's headquaters in Langley, Virginia. He pointed out in his memo that the Foreign Ministry of Kuwait had entered into an agreement with the Central Intelligence Agency to begin applying pressure on Saddam Hussein in order to create a confrontation with him. The border dispute would become a convenient pretext.

After finding this document, we contacted the Middle Eastern Division of the National Council of Churches, under the supervision of George Bush's personal priest, Episcopal Bishop Bob Browning. Bishop Browning was summoned to the White House on the night of January 15 when the military strike against Iraq was to commence. He refused to come, instead condemning the President for immoral actions. He stood in front of the White House leading a public demonstration against the action the President was going to take. We felt this man had earned credibility, so we were interested when he put us in touch with Michael Klare, Professor of Peace and National Securities Studies at Amherst.

Klare realized that when President Mikhail Gorbachev of the Soviet Union made his extraordinarily important series of unilateral announcements that the Soviet Union had decided to dismantle the Warsaw Pact and withdraw from the Cold War with the United States, many people across the world were greatly relieved: the potential for future nuclear holocausts throughout the world would be eliminated.

But not everybody in the United States viewed this message with great joy. As Klare discovered, leaders from

both the Pentagon and military industries viewed these announcements with great consternation and panic. A series of meetings in mid-1989 began to take place in the White House and the Pentagon on the new orientation of the American armed forces. Planners realized it would no longer be necessary to spend from 300 to 500 billion dollars a year building strategic weapons such as Stealth Bombers, Stratocruisers, and independently targetable nuclear warheads and nuclear missiles. Instead, the same amount of money would be used to retool the American military, focusing on tactical war-fighting capabilities such as tanks, armored divisions, and jets. Most importantly, they wanted to create the capability for fighting small low intensity wars against third world countries—the type of warfare that would require vastly mobile military units and underwater warfare equipment, enabling small teams to sneak into foreign countries.

The documents made it very clear that the mission of certain elements within the military and industry was to create a military shield in order to protect access to strategic raw materials in third world countries on behalf of the new Northern industrial alliance. This comes directly from United States Pentagon documents which talk about redefining the role of the United States military. Interestingly enough, two of these documents, one from the United States Air Force in January 1990 and a June 1990 document from the United States Army, are entitled "Global Reach, Global Power." Both of these documents specifically designate Saddam Hussein, Iraq, and Kuwait as potential examples to justify a continuing need for massive military development in the United States. Any type of peace dividend was perceived as shifting money out of bureaucratic pockets into wasteful expenditures, such as public health facilities, education, loans for people to be able to go to college, public transportation systems, and the salvaging of the environment of the U.S.

Photo of Daniel Sheehan by Ted Keenan

The documents also enable us to understand Kuwait's purchase of slant drilling equipment in December of 1989 from the Santa Fe Drilling Company in the U.S. Brent Scowcroft, George Bush's National Security Adviser, is a major stockholder of Santa Fe. With this equipment in place, Kuwait began drilling into the oil reserves under Iraq. The international market was then flooded with Kuwaiti oil (actually from Iraq), and by early 1990 this oil was being sold at prices well below those set by the Organization of Petroleum Exporting Countries (OPEC), of which Kuwait is a member.

We also obtained a copy of a CIA transcript of an October 29, 1985 meeting in Frankfurt, Germany between Oliver North, Richard Secord, Albert Hakim, and the "second channel" from the Iranian government. In this meeting, not only do North, Secord, and Hakim promise to sell TOW missiles to Iran in violation of the Arms Export Control Act, but they also assure Iran that the Reagan-Bush Administration will overthrow Saddam Hussein for them. This is a stone cold verified agreement that those people made.

When we look at the New World Order as envisaged by George Bush, we see a new Northern Industrial Alliance—economic and military—against third world nations who deign to believe they actually possess and have the right to control the resources beneath their land. And what does this New World Order look like? Mark my words, in the Spring of 1992 you will see both George Bush and President Gorbachev invited to the summit conference of the European Economic Community (EEC). It will be an alliance between the United States, the new EEC—with a united Germany being the dominant partner—and the Soviet Union. But not all the Soviet Union: the country is going to be divided, losing certain Slavic and Asian provinces while leaving intact the Caucasian elements of the Soviet Union, the Europeanized white Russians. This is the community that will become part of the new Northern Industrial Alliance, and it will be the U.S. taxpayer who will be asked to provide the financing for the military shield against third world countries....

People are beginning to despair, saying that after 25 years of organizing, litigating, and educating against the Vietnam war, somehow it was all futile, and American people are still receptive to warmaking propaganda....

But we make up a very special generation—born between 1945 and 1963—the 18 year period of the baby boom. We are 75 million strong, we make up 44.7 percent of the eligible electorate in this country, and we are going to be joined each and every year by new potential voters—the children of the baby boom generation. When we began college, we made promises; promises to reveal the lies, prosecute the wrongdoers, and make America stand for what we were promised this country was about—democracy.

We need to organize ourselves into a new, independent political party in this country. We need to fight back and to know that we are obliged to keep the promises we made to this country. These promises, made during the sixties, will be kept; and in fact, we will make this country something that is worth dying for or we will die trying.

Milk and Politics Ravage the Youngest Iraqis

by Barbara Nimri Aziz

Host of Tahrir, *Tuesdays at 1:30PM, and an* Undercurrents *correspondent, Barbara Nimri Aziz wrote this article while on assignment in Baghdad this past May.*

Through the wards of Iraq's primary pediatrics hospital in Baghdad, healthy looking mothers stand dazed over the beds of their dying infants. "It's because of the milk," explains Dr. Tariq Al Dah'iri, "that these babies face death."

The pediatrics consultant of Saddam Hussein Children's Hospital takes a tin of powdered milk off a bedside table and displays the label. "Look," he points out impatiently, "made in Holland. It's all from outside – France, USA, Belgium, Switzerland."

Whatever milk tins are to be found here are the remainder of an increasingly short supply of food for Iraq's youngest citizens. Since the crisis began on August 2 and sanctions were imposed on Iraq, this basic food has been rationed and supplies continue to be dangerously low.

"A normal healthy infant needs 10 tins of 450 gms each per month. We had enough in the past, from our local production and from imports," explains the specialist. "Today, we can offer each child only three tins a month, less than a third of what is required." Some powdered milk can be found on Iraq's black market (at 6-8 dinar or 18-24 dollars a tin), but it is out of reach of most people.

The malnutrition cases one sees in centers like Baghdad's Children's Hospital are examples of what doctors fear to be a nationwide crisis. As Dr. Qasim Ismael, director of the Baghdad Pediatrics Hospital, notes, "This is the capital, where supplies and facilities are the best. We do not know the situation in many rural areas where imported supplies cannot reach families in need, and where the population cannot get to food distribution and health centers." The south has been further ravaged by the civil rebellion.

If rural women breast fed their babies, as one would have expected, village children would be less threatened. However, there too the same situation prevails. Dr. Tariq reveals the statistic with sadness in his voice, "Across Iraq today, 80% of our babies are bottle fed." Ten percent have a mixture of breast and bottle milk and only 10% remain breast fed by their sixth month. "Our women, rural as well as urban, had largely given up breast feeding, told it was more modern to use bottled milk. When their infants are just a month old, they wean them," he explains. Unable to contain his anger, he turns to a mother seated on a bed by her dying child. He points to the bottle at the infant's side and says to the distraught woman, "Where is your own milk?" She explains simply that her breasts had dried months before. The infant lies almost lifeless. "Six months old and not more than 4 kg in weight," sighs the doctor as he moves on.

Out of Iraq's 6 million children under 12 years of age, 400,000 are 6 month old infants dependent on bottled milk. Dr. Tariq and his colleagues estimate that they need 4 million tins a month to feed these children.

Some critical supplies are now moving into the country, as the embargo on selected items has been lifted. But a health official reports that severe shortages remain. "Shipments are arriving, but not quickly enough and not in the needed quantities. We are also hampered by lack of gasoline."

Another link in the broken chain, gasoline, until very recently, was unavailable for trucks to distribute milk outside the capital. "We didn't even know where the areas of greatest need were with our communications system completely destroyed in the bombing and the disorder in the ensuing regional rebellions," says Qasim Ismael.

Lack of gasoline is also responsible for rural milk being unavailable in cities. When sanctions were imposed before the war, farmers who had surplus milk were unable to get their produce to dairies for distribution to the cities. One typical farmer in Yusufiya, only 50 miles south of Baghdad, reports that since October, she has been converting all the farm's milk to cheese and yogurt.

In this deadly chain of interdependencies that endanger so many, there is also contaminated water. The malnourished children one sees in hospital wards are perishing from gastroenteritis and hepatitis and diarrhea. Children, initially weakened from malnourishment, succumb to diseases carried in the water mixed with their powdered milk. If this is a common problem in Baghdad, one can only imagine the situation outside the capital, where most of the population is forced to use impure water.

Compounding the situation still further is the shortage of medicine and nursing staff. As the number of sick increases, medical supplies, like milk, also are inadequate. "Medicines and the instruments we need to administer care have been slow to arrive and are still too few to meet demands," reports Dr. Qasim, "and we have not yet been able to replace our nursing staff." Baghdad Pediatrics Hospital alone lost 59 trained staff.

In the wards across the nation – in Karbala Hospital and in Nassiriya General Hospital in the south, for example – one sees few nurses today. Many were foreign women from Cuba, Bangladesh, and the Philippines; they left in January. While a few replacements are now arriving, mothers and local staff grow increasingly despairing and fatigued.

One of the most critical areas is Nassiriya, a governate of one million people with a large 400 bed hospital that is only barely functioning. Asked if more publicity regarding the crisis would help, chief surgeon Dr. Ziad Abdul Karim responds, "The people in a position to assist know all the facts. UNICEF and WHO and other organizations and governments know exactly what milk and medicines Iraq regularly imported in the past to meet its needs; outside agencies know what is essential for our survival."

Like other doctors, he has no doubt that this continued lack of international attention to the nation's health needs is part of a wider political policy to destroy Iraq.

Past, Present, and Future Shock

by Jennifer Bernet

Jennifer Bernet is currently Operations Director at WBAI. She is also a frequent contibutor to women's programming.

This morning I woke up and realized things are worse for women than ever. The Supreme Court decision to attach a muzzle to public funding for women's health is an attack on us all. As usual, the attack strikes directly at the economically weakest segment of society: poor women.

Forcing women to bear children against their will is societal rape. It is a violent bodily invasion. There are many reasons women become pregnant, and many reasons some women choose to terminate their pregnancies. This Supreme Court decision, which bars even the *mention* of abortion as an option by health care providers at federally funded clinics, usurps the right of poor women to control their bodies and their lives. It punishes them for being poor, and punishes their children, both born and yet to be.

It's ironic that a government refuses to allow women to decide how large a family to have, yet also refuses to provide basic services for pregnant women and babies. Poor women are denied access to prenatal health care and drug treatment programs, resulting in tremendous neonatal intensive care costs and one of the highest infant mortality rates in the industrialized world. Poor women and their children are denied food, shelter, and education by self-styled fetus saviors who expect the poor to pull themselves up by their bootstraps to a middle class whose ranks shrink daily.

Illustration by Eric Drooker

It is interesting to me that in 1925, German satirist Kurt Tucholsky described a fetus discussing its predicament. The fetus noted: As long as I remain in here, I'm protected by the state, by welfare agencies, by society, but as soon as I'm born, they don't care if I eat from garbage cans.

Understandably, the fetus wanted to stay where it was.

Nazi Germany had abortion laws so strict that anyone having or providing an abortion was subject to the death penalty. I'm reminded of a German rhyme of the day: Madchen macht die Beine breit, Deutschland braucht Soldaten. Girls spread your legs, Germany needs soldiers.

Judging by U.S. foreign policy, a force-bred caste of soldiers may be just what the Constitution bashers and spin doctors ordered.

Is the Party Over for Tompkins Square Park?

by Paul DeRienzo

Paul DeRienzo reports frequently on the Lower East Side for the News Department and is a correspondent for Undercurrents.

Another long, hot summer in New York City is upon us. The city government, in all its wisdom, has decided that the easiest answer to homeless people living in parks, drug dependency, the alienation of youth, and radical disaffection is to sweep the problems under the rug.

So at 5:00 on the morning of June 3, hundreds of cops led by Parks Commissioner Betsy Gotbaum moved into Tompkins Square Park and closed it, despite almost the entire Lower East Side community's longtime expressed interest to keep it open.

The "reason" for implementing a plan expected to cost 10 million dollars in police overtime was a near riot during a music festival on Memorial Day. However, what the newspapers and television failed to mention in the blizzard of anti-homeless and anti-free speech editorials and columns, was that the Memorial Day incident was a direct (if somewhat overdone) reaction to police brutality.

The media outlets, except for WBAI, failed to report that an African American youth, Anthony James, who had not been drinking and was not in possession of any alcoholic beverage, was beaten by an officer for nothing more than refusing to show his ID.

While some of the actions that occurred through the night in response to the beating of James were immature and indefensible, the fact remains that the bottle throwing was the result of built up rage in response to constant petty police harassment.

Now the entire community of the Lower East Side has been deprived of its park for at least a year so the city can do unsanctioned and unwarranted "renovations," leaving thousands of people who did use the park every day no respite from the summer heat. Despite the protests of a handful of gentrifiers and misguided yuppies, the fact remains that the park was used extensively by children, youths,

families, and other residents, as any visit to the heavily used playgrounds could have shown.

Now those playgrounds have been closed by the city itself, forcing those same children into the streets along with the homeless people who now are trying to continue their lives in doorways and empty lots: all this at the cost of ten million dollars to a city supposedly too broke to provide basic city services to poor people or to maintain existing services to its middle classes.

Throughout the summer, activists promise to unite the diverse people of the Lower East Side in fighting the city's closing of their park. They say they will not put up with the destruction of their neighborhood by an insensitive city apparatus, a rallying call that has even formed alliances with the more conservative forces which favored a curfew in Tompkins Square Park. Already demonstrations of hundreds of people have erupted into near riots, as overworked police try to prevent the liberation of the park.

These events are important for people throughout the city and the country; if it can happen here, it can happen anywhere. If the wishes of a locality can be overruled by a central authority that floods its streets with hundreds of police, blocks off access by residents to their own homes, and creates an atmosphere similar to that found in South Africa or Guatemala, then what might the future hold?

In Celebration: Antonio Vivaldi

March 4, 1678 - July 28, 1741

by Chris Whent

Chris Whent hosts Here of a Sunday Morning *every week at 9:30AM. Tune in on Sunday, July 28 from midnight to 1:00PM as he joins forces with Manya and The Laughing Cavalier to commemorate the 250th anniversary of Vivaldi's death.*

So why should WBAI be marking the 250th anniversary of the death of the man they called the Red Priest?

Antonio Vivaldi was born in 1678, the son of one of the leading violinists of St. Mark's Chapel in Venice, one of the most important and famed musical institutions in a city that still, despite political and economic decline, retained a vibrant and renowned musical life. Highly gifted as a child, he was nonetheless sickly. Perhaps his father (who by dint of very hard work had improved his own status from hairdresser to musician of some repute) felt that the child needed all the help he could get in life, for the young Antonio was indeed educated both for music (under Legrenzi) and for the priesthood.

Although ordained, Vivaldi said few masses. It is unclear why. He himself once wrote, "It is twenty-five years since I last said mass, and I am not going to say any more masses, not because I have been forbidden to, or ordered not to, but because I have decided not to, of my own free will, on account of a certain problem I have had since birth and which continues to trouble me. After being ordained as a priest I said mass for a little over a year, but then I had to stop after I had three times been forced to come down from the altar without having completed the mass because of my affliction." We shall probably never know what this affliction, real or imagined, was. Certainly it is difficult to believe that it was his "weak chest," which apparently did not have any adverse effect on him as a musician. It would, however, unquestionably be an injustice to dismiss the words as mere hypocrisy uttered as they were at a moment of great despair, just after the bishop of Ferrara had refused to let Vivaldi enter his city on the grounds that although he was a priest, he did not say mass and furthermore had a singer for a mistress.

Possibly he regarded his music as the highest form of service he could offer to his church. On the other hand it is not always easy to reconcile the teachings of the catechism with the somewhat shady methods sometimes used by the composer-priest and his friends in pursuing their ends, and in particular their profits. Perhaps the best insight we will get into Vivaldi's personality and character is that of Remo Giazotto, who noted that while Vivaldi must certainly have felt a vocation for the church, he had since early childhood been endowed with "an eminently practical turn of mind."

In celebrating this "practical" man, we are not celebrating mere diligence resulting in a prodigious output, one that sometimes seems overwhelming. Remarkable as this was, neither his output nor the phenomenal speed with which he worked (Vivaldi is said to have completed his opera *Tito Manlio* in five days) is extraordinary for an eighteenth century composer. A feature of the eighteenth century that it is today hard for us to appreciate was the constant demand for new music. There were no "classics," and few works survived more than two or three seasons. Quite simply, the market had expanded rapidly, as it would continue to do, while production methods remained those of a less dynamic age and marketing genius had not yet persuaded the public that there existed a repertoire that could be endlessly reheard, as it succeeded in doing by the next century.

Like his contemporaries, Vivaldi composed every work for a specific occasion and for a particular company of performers. He was commissioned to write forty-nine operas, most of them for Venice, but some also for Florence, Verona, Rome, and other Italian cities. His duties at the Pieta, the conservatory founded for orphaned and illegitimate girls, where he was employed as a conductor, composer, teacher, and general superintendent of music, required him to write oratorios and church music; for the Pieta he also wrote concertos, the form of instrumental music commonly used at church festival services. About 450 concertos are extant, in addition to about 23 sinfonias, 75 solo or trio sonatas, 49 operas, and many cantatas, motets, and oratorios.

Vivaldi was typical of the early eighteenth century composer in other ways in that one can find traces in his work of all the changes occurring at the time: at the conservative end of the spectrum, sonatas and concertos in the style of Corelli, and at the progressive, works such as the twenty-three "sinfonias," which clearly demonstrated him to be amongst the earliest forerunners of the pre-Classic symphony.

What we shall be celebrating, however, will be the prodigious quality of this output, a quality that made his influence on instrumental music in the middle and later eighteenth century equal to that of Corelli a generation earlier and determined his place as one of the most important figures in the transition from late Baroque to early Classical style. The assured economy of his writing for string orchestra was a revelation. It was his dramatic conception of the role of the soloist that was accepted and developed in the Classical concerto. Above all, concise themes, clarity of form, rhythmic vitality, and impelling logical continuity in the flow of his musical ideas—so characteristic of him—were transmitted to so many other composers, especially directly to J.S. Bach.

We hope you can join us on July 28 when we shall mark the 250th anniversary of the death of this titan. And the Red Priest nickname? The priest we understand. The red is more difficult; the usual assumption that he was redheaded is probably wrong. Perhaps we shall yet discover among his papers....

Karen Thompson is the lover of Sharon Kowalski, a 32 year old physical education teacher who was critically injured when a drunk driver smashed into her car. Kowalski's parents have attempted to keep the two women apart, and last April Judge Robert Campbell awarded custody of Sharon to a third party. Karen will talk about this long, agonizing case and the three "isms" that have come together to keep her from her lover: homophobism, ableism, and sexism.

Tolley Gorham, who placed his son in an institution after being told this was the only way to obtain services for him, is president of the Oak's Group, one of the plaintiffs in a class action lawsuit in the California Bay area pertaining to the inappropriate institutionalization of developmentally disabled children and adults. Mr.Gorham will talk about this case and tell us about the laws that are being violated.

A Prideful Seven Years and Counting

by Larry Gutenburg

About seven years ago, a few years after I had made the trek from the Midwest to New York City, I began my volunteer, queer on-the-air work at WBAI. The opportunity to make gay radio had always been a dream of mine. In the beginning, I worked with the likes of R. Paul Martin, David Wynard, Maurey Rosen, and others on Tuesday night's *Gay Rap* show.

Currently, I alternate with Gonzalo Aburto producing *An Afternoon Outing* Thursdays at 1:30PM. And with Bob Storm, Allen Ross, Marie Becker, Kurt Wolf, Rick X, and other members of the the Gay People's Radio Group, I produce *The Gay Show* (alternating with *Outlooks*) Sundays at 7:30PM.

While gay programming at WBAI has changed titles, days, and hours, it is now healthier than ever (minus the one sabbatical that occurred when we had our first openly gay program director a few years back).

Speaking of health, I am now a person with AIDS. In addition to gay programming, I produce AIDS programming like the recent *People With Aids Coalition Radioline*. It is clear to me that gay and AIDS programming are two distinct components of WBAI. People with AIDS or HIV must lend their voices to WBAI. They are the ultimate voices of expertise.

I plan to continue volunteering at WBAI as a producer and host of both gay and AIDS programming. Perhaps they might even give me a chance to do some other things on the air. To serve the members of WBAI, by illuminating the crises and celebrations of gay life and the challenges of AIDS, is very fulfilling. Now, in what are probably my final years, WBAI allows me to thrive in an important way. It allows for me to stay proud.

1:00 Labbrish. Live radio with Habte Selassie.

Coming Out: One Man's Journey

by Allan Ross

Allan Ross is a producer and co-host of The Gay Show, *heard on alternating Sunday evenings, 7:30-8:30 PM.*

This June marks the 22nd anniversary of the Stonewall Riots, universally recognized as the beginning of the Gay Liberation Movement. On a personal level, it marks my first anniversary on WBAI, and the first anniversary of my coming out, my own "Gay Liberation Movement."

Movements begin with small steps. Rosa Parks did not set out to start a revolution when she refused to give up her seat on a bus to a white person in Montgomery, Alabama. She had worked hard that day and was tired. But her act of "defiance" set off a spark that spread, first throughout the city, then across the country, and the Civil Rights Movement was born.

So it was in a small bar in Greenwich Village in 1969 that another movement was born. A group of people had come out that summer night to mourn the death of Judy Garland, who had died earlier that week.

The police, quite accustomed to harassing homosexuals, raided the Stonewall Inn in what was a routine operation. But this time, there was a difference. Like Rosa Parks a decade earlier, the "queers" resisted, refusing to cooperate in their own oppression. Led by some drag queens, who had nothing left to lose, they fought back, and they fought hard. When the dust had settled, everyone knew that there was no turning back. A movement had begun and a new phrase was heard for the first time: "Gay Pride."

As the years passed and the movement grew, so did all the ramifications of Gay Pride. "The love that dare not speak its name" was being shouted in the streets. The crowds grew from a gathering, to a rally, to a parade which numbered hundreds of thousands of proud women and men. The annual parade in June drew people from all over the world to New York, and cities and towns across the country began their own Gay Pride celebrations.

I was seventeen years old when Stonewall erupted, about to enter college. To say that the struggles of a disgruntled group of homosexuals had a great impact upon my life would be a vast overstatement. Although I was gay, I would not admit it to anyone, not even to myself. The media's coverage of the parade, with its emphasis on the silly or the strident, turned me off. I felt no identification with these people in their ridiculous costumes with their strange rhetoric. Their fight was not my fight.

Of course I did not realize at the time that their struggle was very much my struggle. I was a victim of my own homophobia, my own self-loathing. While I knew I had sexual longings for other men, I thought it was just a phase I would outgrow. I believed that "the love of a good woman" would save me, would heal me, would cure me.

My reward for my denial of my sexuality was an aching loneliness, an acute sense of isolation and frustration. My friends and relatives married and had families. When questioned about my love life, I would reply that I wasn't ready. I was too independent, too free spirited; I was a loner. Or I would periodically invent fictional romances, punctuated with suggestive comments, to prove I was a real man. I so desperately wanted to be "normal," that I would settle for the illusion of normalcy.

Just as movements begin with small steps, I believe that revolution begins with revelation. I can't think of one specific event, one catalyst, that led to my self-acceptance. There is a long distance between awareness and acceptance; there is another long distance between acceptance and affirmation. In my case, coming to the gradual realization of who and what I was took a long painful process of evolution and evaluation. I had to give up the heterosexual dream. I had no chance for future happiness. Or so I thought.

Once I became truly aware of who I was, acceptance was still far off. My sexuality was still my "dirty little secret." My isolation was still acute.

Two factors helped me in my progress. I developed friendships with other gay people which made me see that I was not alone. And I became increasingly involved with WBAI, first as a listener, then as a volunteer.

It was WBAI's eclectic programming which captured my imagination, and its gay and lesbian programming which stirred my soul. I became a regular listener to *The Gay Show* (from the security of my closet, of course). I learned about other gay people and their own struggles, both personal and political. And I identified. When WBAI aired its first day-long coverage of Gay Pride Day two years ago, I listened all day. I silently cheered the participants and felt a true kinship with my sisters and brothers. And I knew that someday, in some way, I would join them.

Last year, I crossed that line and made that decision. I wrote a letter to *The Gay Show* stating my desire to join the program. To my surprise, and initial trepidation, I received an invitation to participate in the next show, which coincidentally would be the Gay Pride broadcast. On that fateful day, June 24, 1990, I was given a brief introduction, a microphone, and a lesbian couple to interview, and I was on my way.

The decision to appear on the air, and to use my real name, was easy compared to my next move: to tell my friends and family. For the most part, the reaction I received was most gratifying. The love and support that was expressed made me wonder why I had waited so long.

There were two notable responses to my news. My mother's eyes widened in shock, then she started to cry, and then she threw up. (And in all, I'd say she took it well.) My best fried, however, did not, and there exists a strangeness between us that has damaged a 20-year friendship. I'm hopeful this will change one day.

One year after coming out, I find myself in a wonderful place. I am now a full-fledged producer of *The Gay Show*, and the people I have met have taught me so much. Working with Larry Gutenburg, Marle Becker, and Bob Storm, the other producers, has been educational, enriching, and rewarding. I've met and interviewed so many interesting and exciting men and women. My consciousness and enthusiasm have been raised to a level I didn't know existed. And I realize how much I have yet to learn, and how far I have yet to go. My journey of self-discovery has been a sweet ride, and I know I've come home.

The future looks bright, indeed.

Many of the most important innovations in the history of our medium were developed at stations broadcasting out of Mexico known as "border blasters" because of their enormously powerful signals – up to 1,000,000 watts! (WBAI is 50,000 watts.) Tonight, *Soundscapes* presents the first of a two-part celebration of these amazing and often revolutionary radio stations. This program was inspired by and is based upon the book *Border Radio* by Gene Fowler and Bill Crawford. We'll interview both authors. Produced and hosted by Peter Schmideg.

Is thinking about things the same as thinking about beliefs? About persons and relations? About ideals... and love? About ourselves? Why bother our heads over it?

Socrates said the best wisdom is knowing you don't know! This is a Spiritual Philosophy and Spiritual Revolution/Evolution. It is crucial to beat out the Thought Police. Let's think a little together about "thinking"... make a start from where we are. We've got to get deeper than they can reach! Pure Reason is more a weapon than it may seem... William Borman.

Host: Regina Fiorito Sokol.

6:30-7:30PM Ryan's (Only In) New York. Host Lee Ryan and the Usual Suspects celebrate our favorite city and Leonard Bernstein's birthday, with a few words about Usual Suspect Patrick O'Connor (August 26) and Dinah Washington (August 28).

7:30-8:30PM Outlooks. How about it? A solid hour of music. A little bit of fun at the end of the summer. Produced by Gay and Lesbian Independent Broadcasters (GLIB).

10:30PM-12:30AM The Creative Unity Collective Show. Because press time for this *Folio* is extremely early, there's no way we can know exactly what we'll do tonight, so we'll just make outlandish claims that everyone will recognize as pure fiction.

On tonight's episode, Madonna and Michael (Michael Mabern) do a dramatic reading from August Wilson's *The Piano Lesson*; Darrell (Darrell McNeill), Pat Buchanan, Reverend Calvin Butts, and Texas Governor Ann Richards debate the practice of "race norming"; Yusuf (Yusuf Lamont) conducts the New York Philharmonic in its performance of his original composition, "Concerto for Racial Oppression and Clarinet in F"... sorry, but it's been a long, hot summer. BACKTALK!

To Underground Railroad,

Hi, my name is Chrystal Beninclg. I listen to your show whenever I can. I really enjoy it. I mean you play the JAMS!! Not just commercial *shit*! (Excuse my French!)

Don't worry too much about support, because you have a devoted listener. Love, peace and hair grease!

From, Chrystal Beninig
Uptown

Dear Mr. Phillips,

I am a listener/subscriber of your fine radio station, WBAI. The show which originally got me hooked is *Radio Free Eireann* but unfortunately it is far too short. Mick Dewan and John McDonagh are producing a program that is necessary in order to receive news from and about events in Ireland, particularly Northern Ireland, that is unavailable anywhere else on the radio dial and that you would certainly never see on television news shows.... Please consider expanding the program to an hour so that Irish-Americans and others who are concerned with hearing the truth about the Irish freedom struggle can fully reap the benefits of this outstanding and important program....

Sincerely, A. Rodriguez
Staten Island, NY

Dear Andrew,

As a result of a conversation with Rosemari Mealy on yellow ribbons, and an expansion of an idea presented by Malachy McCourt, the following was sent to "Letters to the Editor" sections of several local newspapers:

"After the troops come home and there will be no need for yellow ribbons, it would be heartening if we were as enthusiastic in displaying black ribbons for our dying cities, for homeless people, for the unchecked increase in AIDS, for our declining educational standards, and for our dying ecology.

America is dying and many of its cities are dead already. Our despair should be made known."

Please show this to the program producers. They may be interested in the concept.

Thank you, Benedict Terrazzino
Metuchen, NJ

Dear Mr. Phillips:
I would be interested in hearing an Atheist program on WBAI. Americans are bombarded with religious programming on all forms of mass media, and I think it's only fair that some stations should be brave enough to air another point of view. I believe a lot of other listeners would be interested in an Atheist program also....

Sincerely, Joan Robertson
Bronx, NY

Dear Sir,
Thanks for the wonderful programs of the Gray Panthers hosted by Lydia Bragger.

The program on April 3rd was most informative and enjoyable.

Please pass this on to Ms. Bragger. Again thanks!

Sincerely, Estelle Katz
New York, NY

Dear Mr. Phillips:
[I write] to tell you of how we (friends in group) and I experienced William Borman's program on WBAI last night. We were literally hypnotized, all conversation stopped, no one spoke until the very end of the show.

When we broke for chatter, we all agreed it was the first time in years any of us had heard such a positive, illuminating, passionate, and at the same time spiritually sophisticated program on radio.

This kind of rare stuff requires follow-ups, and after congratulations, we would request and even urge you as program director to give us the privilege of having it come on more steadily. It is going far, clearing up confusions, causing a definite rise all around.

Gratefully, Georgette Scott
New York, NY

Dear Mr. Kaku:
I (along with Ralph Schwartz, my fiance) am a regular listener of your show, which I discovered in the late Fall, 1990 as the pre-war/peace movement led me back to WBAI. I am delighted that you are now on the station's Board and want to discuss three areas of concern with you.

1)Blind and print disabled people cannot read the Folio. (I am print handicapped due to asthma, with a very limited access to material xeroxed on "safe" papers, etc.) A substantial number of blind and visually disabled people are radio listeners, obviously. Those of us who are homebound are "heavy" consumers of radio, as well. How about a cassette edition of the *Folio* (audio cassette)?...

2)The only awareness of disability by the station seems to be a one hour show by Disabled in Action (DIA) once a month. I applaud that show and wish you would have more coverage of disability news. One recent example of producers' lack of disability awareness is that in all the pre-St. Patrick's Day Parade furor over the Irish Gay & Lesbian Group excluded, initially, from the parade, only one person on WBAI within my hearing time, mentioned that wheelchair users were excluded also. And in the coverage of the parade, post-parade, no one mentioned the wheelchair users (who had to threaten to sue to get into the parade).

3)*The cat.* Several years ago (circa 1983), before I was chronically ill and homebound with CFS (used to be called Epstein-Barr virus), I was invited to be interviewed at WBAI, but could not go due to the cat in the studio. The cat is still there. People who are allergic to cats are denied access to WBAI's studio.... I do not like a station that calls itself a community station excluding so many disabled people by having a cat on premises.

Sincerely, Sandra Aronson

Dear Bob Lederer and Betsy Lenke,
Yes, I am listening. You give me inspiration and hope. Just stay on the radio. I don't care at what time. Just be there.

A listener
New York City

Dear Malika Lee:
Keep up the good work. Your program is interesting, though most times, I get the last 1/2 hour as I'm leaving work. But on March 6, 1991 I listened as you allowed a 96 year old woman to express herself and reveal information about the old days re: education. She said, "Well I got enough education to know what a heap would mean." In that moment I suddenly "felt" what our striving over the years meant: Brown v. Board of Education, other cases and legislation. I realized why it was significant. Now I always knew why. I'm saying I "felt" why.

Your program communicates to the people in a way no documentary or history program can—an eye witness account, just flat out, unrehearsed, presented "as best we can" conveys a personal, identifiable message. Thanks!

Love and Peace, Doris Evans
New York, N.Y.

Dear Sirs,
Let me commend you for the masterful program *U.S. On Trial with Ramsey Clark*. It seemed to many of us that this was a very vital contribution to your listeners. I'm sure there will be much criticism and outrage addressed in your direction, but I would urge that you hold to your guns and keep speaking out.

Thank you and bravo!

Sincerely, N. Booth
Newcastle, ME

Dear Mr. Phillips,
I enjoyed hearing Warren Harry on Dred-Scott Keyes' *Morning Show* in May. As a community activist and as someone who formerly spent a lot of time volunteering with prisoner-initiated programs at Greenhaven Correctional Facility, I feel programs such as this, which address issues relating to prisoners, parolees, and ex-convicts, are much needed.

If we are to create solutions to problems of crime (rather than just locking people up and hoping they go away), we must have an open dialogue involving people who have been in prison....

Sincerely yours, B. Easton
Kingston,NY
